

Join Pacific College's Online Faculty!

Pacific College of Oriental Medicine (PCOM) is accepting applications for online doctoral faculty.

While the positions require subject matter expertise and dedication to high academic standards, they also offer the convenience of teaching dedicated students from the comfort of your home.

If you have an interest in the following subjects, please contact lguptha@pacificcollege.edu.

Application Deadline: August 1, 2018

Foundations of Evidence-Informed Practice (FEIP)

Evidence-informed practice is an approach to decision-making that integrates clinical experience, relevant findings, patient preferences, and research.

Inter-Professional Communication

Students will explore recognized methods of communicating healthcare issues to patients, their families, and healthcare team members. They will be challenged to describe Chinese medicine theory, techniques, and case information to biomedical professionals, as well as patients. Conversely, they will improve their ability to apply biomedical terminology.

Healthcare Systems

In order to play a significant role in the system, students must understand the incredible variety of institutions and personnel that deliver healthcare across the wide spectrum of our diverse population. Along the way, students will grapple with the most challenging medical questions of our day and seek to identify Chinese medicine's role in answering them.

Preventive Medicine and Public Health

Preventive Medicine and Public Health presents epidemiology, risk factors, determinants of health, effects of different cultural practices, genetic predispositions, the effect of climate on the incidence of disease, and more. In addition to conventional therapies, students will analyze and evaluate the role of Chinese medicine in preventive medicine and public health, along with the effects of diet, exercise, meditation, and more.

Advanced Integrative Diagnostics

Students will further their understanding of biomedical labs, diagnostic imaging, health screening, functional medicine, and more. Student will increase their ability to exchange diagnostic information with other healthcare providers. Most importantly, students will be able to critically analyze diagnostic options and inform patients of their relative merits.

Clinical Research and Design

The course presents the principles of experimental research design and statistics. It is designed to give acupuncturists an understanding of valid research and an appreciation of its importance to our profession.

Integrative Case Management

Using the case-based method, conditions from a variety of specialties will be presented to develop a template for the integrative case management of biomedicine and Chinese medicine.

Practice-Based Learning

The course will help the student examine the two fundamental aspects of their healthcare career: patient care and practice building. Students will identify areas in which both can be improved and create a personalized plan for further development.

Application of Inter-Professional Communication

This course provides an opportunity for mentored clinical dialog in an approved biomedical setting. Doctoral candidates will observe and discuss cases at practicum sites of their choosing in their own locale with, e.g., medical doctors, osteopaths, physician's assistants, nurse practitioners, chiropractors, or naturopaths, etc.

Prospective faculty will have exceptional communication skills, a passion for teaching, and demonstrated knowledge of the subject matter.

Minimum/Required Qualifications:

- Terminal degree or recognized expertise in subject matter
- Teaching experience and a student-centered teaching philosophy
- Familiarity with instructional technology

Desired Qualifications:

- Doctor of Acupuncture and Chinese Medicine (DACM)
- Doctor of Acupuncture and Oriental Medicine (DAOM)
- Other subject related doctorate, e.g., MD, DO, DHS, PhD, PsyD, EdD
- Familiarity with webinar-based presentations
- Familiarity with synchronous online education

Application Deadline: August 1, 2018

To apply, please send a cover letter describing qualifications and your curriculum vitae to lguptha@pacificcollege.edu.

Pacific College of Oriental Medicine is one of the oldest and largest accredited institutions training professionals in Oriental medicine, acupuncture, massage and holistic nursing. Founded in 1986, Pacific College now has students and faculty in New York, San Diego, Chicago and online. We offer the opportunity to work with a dynamic team of professionals. We are committed to creating a diverse, international community of faculty, staff, and students.

Pacific College of Oriental Medicine is an equal opportunity employer. Applicants are considered on the basis of their qualifications for the position without regard to race, color, religion, sex, sexual orientation, national origin, citizenship, age, marital status, disability, veteran's status or any other personal trait protected by federal, state or local law.
